

WALKSTAR

WALKING AID

REVERSE WALKING AID

FOR CHILDREN, TEENS AND ADULTS

For those who lack general stability when walking and standing comes the Walkstar, a simple and easy-to-use medical device that allows the user to move freely without bulky and off-putting equipment.

Available in a range of sizes and colours the Walkstar fits small children right up to those in their teenage years. Lightweight and narrow this paediatric walking aid can be used outdoors, at school, or at home with its easy folding frame for transportation.

- > Safer with reverse lock and steering lock
- > Available in five different sizes
- > Integrated handle
- > Steerable front wheels (optional accessory)
- > Vertical handles with armrests (optional accessory)
- > Friction and wheels brakes (optional accessory)
